SKILLS

- .NET / ASP.NET
- Optimizely / EPiServer
- Web APIs
- Unit & Integration Testing
- Azure Cloud
- Docker / Kubernetes
- CI/CD
- SQL Server
- Angular / TypeScript / Jest
- Microservices
- Vertical / Clean Architecture
- AI Fundamentals

CERTIFICATIONS

Optimizely Opal Tools

2026 - 2028

Optimizely DXP Administrator

2026 - 2028

Optimizely PaaS CMS Developer

2026 - 2028

Optimizely SaaS CMS Administrator

2026 - 2028

Optimizely PaaS CMS Administrator

2026 - 2028

PROFESSIONAL OVERVIEW

Enterprise .NET & Azure Specialist with 15+ years of experience building scalable, secure APIs and web applications. Skilled in Optimizely CMS, Azure, and Angular, with strong ownership from solution design to delivery across enterprise domains including energy, automotive, and media.

WORK EXPERIENCE

Solution Designer and Senior Developer

Vattenfall, Stockholm | 2000 - Present

- Designed and delivered enterprise CI/CD pipelines for Optimizely CMS 12, improving release reliability and efficiency.
- Led migration of Optimizely CMS from version 11 to CMS 12, enabling a modern .NET-based, cloud-ready platform.
- Containerized Optimizely CMS using Docker to enable scalable, reliable, and consistent deployments.
- Designed and integrated .NET Web API for data persistence, applying clean architecture principles and best practices.
- Implemented Azure Front Door to enhance security, DDoS protection, global traffic routing and static asset caching.
- Modernized legacy AngularJS applications by migrating to Angular Elements, improving performance and maintainability.
- Delivered AI-driven chatbot solutions using NLP and scalable backend services to improve user support efficiency.

Senior Backend Developer

Volvo Cars, Gothenburg | 2019 - 2020

- Designed and implemented .NET Core microservices to store and manage contract data integrated with SAP systems.
- Enhanced Jenkins CI/CD pipelines to deploy containerized applications to Azure Kubernetes Service through Docker.
- Developed Azure WebJobs to continuously process unhandled contract messages from Azure Service Bus.
- Implemented API security using subscription key authentication and custom policy-based authorization.

WORK EXPERIENCE

Fullstack Developer

Scania, Södertälje | 2018 - 2019

- Designed and implemented .NET Web API endpoints to support frontend communication and data persistence.
- Migrated legacy ASP.NET MVC functionality to Angular web components, improving maintainability and UX.
- Implemented unit testing frameworks for .NET Web API to ensure code quality and reliability.
- Automated CI/CD pipelines using Azure DevOps to enable consistent and reliable deployments.

Fullstack Developer

Horizon Media Inc, New York | 2016 - 2018

- Designed and implemented .NET Web API endpoints to retrieve advertising data from Datahub.
- Developed several AngularJS micro-frontend applications to visualize and present Datahub data.
